Hello,

I'm following up on my previous email below on the updates to reuse snapshots. Let us know if you have any questions or suggested revisions.

Thanks!

Marcus

Subject: Region 5 Snapshot Updates -Allied Paper, Inc./Portage Creek/Kalamazoo River

Dear Jim, Michael and Sheila,

As Tom mentioned in his previous email, the Superfund Redevelopment Initiative (SRI) at Headquarters maintains online information about sites in new reuse and continued use. A brief write-up, which we call a "snapshot," for each site is posted on: <https://www.epa.gov/superfund-redevelopment-initiative/region-5-superfund-sites-reuse>

We are looking to update this information to keep it current and would appreciate your review of the attached paragraph for accuracy and any additional reuse information you might be able to provide. Please note these are drafted to focus on site reuse and continued use; they are not meant to provide a remedial overview or comprehensive site history. If readers are interested in finding out more about the site remediation, the CERCLIS profile page will be linked below each snapshot.

If you could please send us back comments April 14th using tracked changes, it would be greatly appreciated. In addition, if you have a site in reuse that we have not captured in the attached, we would love to hear about it! Please let us know the name of the site and we can work with you to develop a new snapshot.

If you have any questions, please feel free to contact me, and many thanks for your assistance with this effort!

Best,

Marcus Griswold, PhD
